AUDIO-VISUAL CLUB

Arthur Gaudet, Dana Keller, Edward McGee, Robert Lynch, Peter McGrail, Jim Hyde, Frank Guerrera, Brian Guptill.

The Audio-Visual Club aids in the presentation of school programs which require the use of audio-visual equipment. Club members distribute and often run the equipment needed by the faculty members in their classes. By their service, club members greatly facilitate the successful execution of the school's ever expanding A-V programs.

Left to Right: Linda Aubry, Anne Marie St. Cyr, Mr. Corcoran (Advisor), Dawn Lordan, Mimi Rhys, Marcie Rhys.

MUSIC CLUB

The Music Club was organized to supplement our present music program. Students listen to and discuss music from all periods of Western Civilization. Beginning with an examination of the contemporary scene the club attempts to progress backwards into history to discover the roots of our present music, and to determine the reasons for the lasting appeal of earlier music.

The Music Club also attends concerts as a group and hopes in the future to sponsor trips for other students interested in attending live performances.

ART CLUB

The Art Club, under the supervision of Mrs. Aubry, is one of North Andover's newest clubs. The group was organized to develop an appreciation of art, to meet the artistic needs of creative students, and to serve the school. This year's activities include a trip to the Boston Museum of Fine Arts, decoration of the school lobby during the holiday seasons, preparation of posters for groups such as the North Andover U N Committee, and many others. Club members Sally Solomon and Holly Demers won first and second prize in the Lawrence Fire Prevention Poster Contest.

This year's officers were Jean Bevins, President; Gail Grusheck, Vice-President; Bob Graham, Secretary; and Bev Lampros, Treasurer.

BAND

The North Andover High School Band, under the direction of Mr. Gerard Corcoran, has once again completed a highly successful season. Throughout the year the band has performed at various school and town functions, including football games, rallies and parades. Though relatively small in number, the band has been able to achieve success through the individual efforts of its members, and through the patient understanding and dedication of Mr. Corcoran.

a coach never loses.

COACHES

The major task is to teach an attitude of mind.

It's to implant character and not simply to impart skills.

It's to teach players to live up to their potential no matter what this potential is.

A coach can never make a great player out of one who isn't potentially great. But he can make a great competitor out of any person.

Coach Sullivan

Although the football team compiled a discouraging won-lost record, the season can still be classified as a success. Lack of size and injuries to key players were contributing factors to the loss of several games. Nevertheless, the team showed spirit in defeat as well as victory.

The prospects for next season are bright with co-captains Pete Sullivan and Tom Ratcliffe heading the team.

The basketball team, under the leadership of Coach Bob Licare and co-captains George Farkas and Pete Piantidosi, compiled an outstanding record of 19-0. In addition to winning the Merrimack Valley Conference Championship and the Bedford Holiday Tournament Championship, the team also won a berth in the Eastern Massachusetts Tech Tourney, where they advanced to the finals before being defeated 35-34, by Holy Family.

The offense, led by co-captain Pete Piantidosi, Lee Zagorski, and co-captain George Farkas, was excellent, but the defense was the key to the success of the team for the "Knights" managed to hold their opponents to an average of only 44 points per game.

From learning laboratories to lunar missions... Raytheon makes things happen.

A high school student dials a lesson and learns at his own pace... A housewife prepares a meal in minutes in her microwave oven... A submarine listens for intruders in the deep... A seismograph crew explores for oil beneath an African desert.

A radar scans the skies and a supersonic missile stands ready if needed... A new petrochemical plant takes form against a Louisiana sky... A phone conversation

is carried by microwaves across the Andes to a remote area of Ecuador... A tiny computer guides an Apollo spacecraft from orbit to on-target splashdown.

These are but a few of the results of Raytheon technology at work around the world.

Today, Raytheon is an international science-based company

employing over 50,000 people. Common threads of technology run through and weave together the company's diverse and growing businesses in both government and commercial markets.

At Raytheon, our future is both exciting and challenging. We hope that your future holds a full measure of excitement and challenge too. Perhaps you will find it with us.
